

LEANUS

Low price and high reliability side by side

A real „Christ“ – but at a bargain. Even with our entry level model Leanus Christ does not make any compromises in build or component quality. All components are manufactured in Europe, the machines are assembled in Christ factories like all other machines. You won't find any low grade components and no cost cutting on the expense of quality. Our Leanus is a high quality machine, but reduced to the essentials.

Each Leanus is built by Christ employees in accordance with our usual quality standards, the low price is achieved by high standardization and the use of proven technology. You won't find any cutting edge technology, but this is also a plus for areas where the next service technician is not just around the corner.

The basic model already includes connections for recycled and fresh water and an LED positioning system. The supply pump and high pressure pump can be integrated in the machine, making it possible to forgo any plant room and speeding up the installation. The Leanus is for clients that need a solid machine at a competitive price.

- | | | | |
|--|---|---|--|
| <input checked="" type="checkbox"/> Active foam | <input type="checkbox"/> Tire high pressure | <input checked="" type="checkbox"/> HP-pretreatment | <input type="checkbox"/> Vitesse option |
| <input checked="" type="checkbox"/> Foam wax | <input type="checkbox"/> Protect Shine Xpress | <input type="checkbox"/> Vario Touch | <input type="checkbox"/> Program display |
| <input checked="" type="checkbox"/> Under-chassis wash | <input type="checkbox"/> Opti-contour dryer | <input type="checkbox"/> Opti-air dryer | <input type="checkbox"/> Jointed brush |

Memory control system

During the brush wash the vehicles contour is measured and saved by the machine. The contour following dryer mirrors exactly the way of the roof brush, safely circumventing any obstacles. Should the car have moved after the brush wash, a light barrier triggers an emergency stop and prevents any damages to the car.

Simple and effective

As our entry level machine, the Leanus is especially easy to install and maintain, even in remote areas. With the integrated supply and high pressure pumps no complicated laying of pipes is necessary and the installation can be finished quickly.

Attractive design

Being an entry level machine is no excuse for an unpleasant exterior: Our Leanus comes with an attractive plastic cladding and brushes in blue and orange. The free choice from the Christ color selection is available on surcharge.

Changes to construction and implementation are reserved. Pictures may show accessories that are subject to additional charges.
